Preface

This book is a collection of analyses, visions and ideas for current sustainability challenges. It is the outcome of a course at Lund University's Department of Economic History. Written entirely by the students each chapter is intended to connect sustainable examples from history to today. We hope spark a discussion, inspire and challenge new ideas for sustainable living, based on what has worked in the past.

1 Introduction

This is a book created from markdown and executable code.

See Knuth (1984) for additional discussion of literate programming.

2 Summary

In summary, this book has no content whatsoever.
